

## HT Control Panels

We manufacture high quality H.T panels, which are highly durable and efficient due to the best quality raw materials used in manufacturing them. Our HT power panels are designed using Vacuum Circuit Breakers and Gas Circuit Breakers with all safety features like Over-Current, Earth Faults and Transformer Protections. The systems are designed to isolate different parts of the plant during faults without damaging the switch gears.

### Attributes

- Controls the timing of electric appliances
- Earth fault protection
- Highly durable
- Transformer protection
- Designed to isolate different parts of the plant during faults
- To handle required power using to feed different loads
- User friendly

### Applications

- Power looms
- Industries
- Steel plants
