

Bus Duct

Features

Bus Duct upto 6000A – 300A with Copper / Aluminum Busbar supported on DMC/SMC support.

Bus bar with Heat shrinkable Sleeves.

Indoor/Outdoor Duty, Separate Adapted Earthing at both End with space heaters & Earth bus.

Applications

Non-segregated/segregated /Isolated phase, cross over-chamber, vertical /horizontal

Bus-duct calculation for designing carrying conductor, heating effects, thermal effects, electro dynamic force, voltage drop

Skin & proximity effects in the terms of bus-bar reactant

Low volt product & medium voltage products having insulator support capacity should be 2.5kv & 11kv respectively with high tensile fastener for bus bar joints & copper flexible
